EDUCATION

B.Sc. in Computer Science
Sep 2014 – Jun 2018
Lakeside Institute of Technology

Higher Secondary (Science)
Jun 2012 – May 2014
Riverdale Public School

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Bash

Frameworks: Django, FastAPI, Flask, React, Node.js, HTMX

Tools: Docker, AWS, GitHub Actions, PostgreSQL, Redis, Git, Terraform, Linux

CERTIFICATIONS

AWS Certified Developer – Associate
May 2023
Example Cloud

LANGUAGES

English – Fluent

Spanish – B2

German – A2

AWARDS

Engineer of the Year
Dec 2024
Northwind Software

Innovation Hackathon Winner
Sep 2023
Northwind Software

SUMMARY

Full-stack software engineer with 6+ years building web platforms in Python, Django and React. Delivered 30+ client projects, led a team of four, and cut average API response time by 45% on a retail analytics platform. Named Engineer of the Year 2024 at Northwind Software. Comfortable with AWS, Docker and CI/CD, and experienced in shipping features end to end, from design to monitoring.

EXPERIENCE

Senior Software Engineer — Mar 2021 – Present
Northwind Software · Springfield, Fictionland

- Platform: Designed Django REST services and a React admin console used by 12 internal teams.
- Performance: Introduced Redis caching and query tuning, reducing average API latency by 45%.
- Cloud: Containerised services with Docker and deployed to AWS (ECS, S3, RDS) via GitHub Actions.
- Leadership: Led a team of four engineers, ran code reviews and mentored two junior developers.
- Delivery: Shipped a customer reporting module used by 8,000+ monthly users.
- Reliability: Added tracing, alerting and runbooks, cutting mean time to recovery from 90 to 25 minutes.
- Recognition: Engineer of the Year 2024; Quality Champion Award 2022.

Software Developer — Jul 2018 – Feb 2021
Acme Digital Labs · Shelbyville, Fictionland

- Features: Built 15+ customer-facing features in Python and JavaScript for e-commerce clients.
- Integrations: Connected payment, shipping and CRM APIs with robust retry and logging.
- Testing: Raised automated test coverage from 35% to 82% with pytest and Jest.
- Migration: Moved a legacy PHP storefront to Django with no loss of search ranking and 30% faster pages.
- Support: Resolved production incidents and wrote runbooks for the on-call rotation.

Software Engineering Intern — Jun 2017 – Aug 2017
Brightwave Studio · Springfield, Fictionland

- Built an internal time-tracking tool in Flask used by 25 staff.
- Wrote unit tests and documentation, and presented the project to the engineering team.

PROJECTS

RetailPulse · retailpulse.example.test · Analytics dashboard for a regional retail chain; ingests 2M+ daily events. Winner, Northwind Innovation Hackathon 2023. · Django, React, PostgreSQL

TaskTrail · Open-source task tracker built with Django and HTMX (fictional, 400+ stars). · Django, HTMX

OpsBoard · opsboard.example.test · On-call and incident dashboard that merges alerts from five tools into one timeline; adopted by three teams. · FastAPI, React, Redis
